

Choose a floor that lasts

Commercial food processing floors take the hard knocks. Often operating 24-7, food processing factory floors must give the operator long term, hygienic and safe operation. Problems with floors cause great interruptions, "smells" and possible compliance to health and safety issues.

Choose Sureshield resin flooring for un-interrupted long life.

Blood , chemical and food acid resistant.

The Factory managers Choice...

Sureshield Resin Flooring for effective Food processing & factory floors

Modern Commercial Factory Floors

Staff working in modern factory environments value the features and benefits of Sureshield Resin flooring .

Sureshield is heat and chemical resistant and will resist even hot fats and oils in a hot cooking or baking environments. Harsh cleaning chemical have no effect on Sureshield and the floor can stay constantly wet. eg fish, meat processing

Flooring finish can vary from smooth for ease of cleaning to extreme non-slip to even the most slippery environment.

Nuplex offer numerous other flooring systems. These include thinner products, repair products and tile overlay systems. (Sureshield (8mm) avoids the issue of tile edges and grout lines). Call Nuplex for specialist advice prior to quotations. Sureshield flooring will satisfy Food safe inspectors and local councils

Why choose Sureshield?

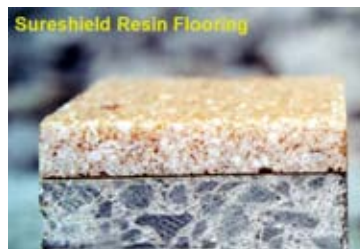

A long lasting flooring is as good as the contractor that installed it. A complex commercial factory will have drains, falls, chillers and freezers and many complex details. Nuplex Contractors are independent installers that will offer competitive quotes but offer quality floors by trained tradesmen who are members of the Nuplex Contractors Federation (see Website).

Just some of the many completed contracts

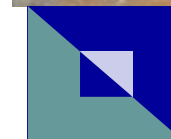

- Fonterra factories, nationwide
- Independent Fisheries, Christchurch
- Auckland Milk, Takanini
- Kapiti Cheese
- Tegal Chicken
- Villa Maria wines, Auckland
- PPCS meat plants

Sureshield has been installed around New Zealand, Australia and the Pacific over the last 30 years and the installations are still going strong.

Speed of Installation: Sureshield is a rapid curing system and small, full installations can be completed within a 24hr period. Larger, complex factories, perhaps with remedial work will take longer. Sureshield resin is cured in 4 hours.

The ability to form coved flooring, fully bonded to the substrates, gives great durability and ease of cleaning.
